## **Quality Control Summary**

Client Name: RMT, Inc.  
 Reported: 01/23/09 at 11:25 AM

Group Number: 1127968

Matrix QC may not be reported if site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD was performed, unless otherwise specified in the method.

Analytical test results for methods listed on the laboratories' accreditation scope meet all requirements of NELAC unless otherwise noted under the individual analysis.

Tests results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff. This report shall not be reproduced except in full, without the written approval of the laboratory.

## **Quality Control Summary**

Client Name: RMT, Inc.  
 Reported: 01/26/09 at 09:02 AM

Group Number: 1127987

Matrix QC may not be reported if site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD was performed, unless otherwise specified in the method.

Analytical test results for methods listed on the laboratories' accreditation scope meet all requirements of NELAC unless otherwise noted under the individual analysis.

Tests results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff. This report shall not be reproduced except in full, without the written approval of the laboratory.

| TDS was initially performed on 1/20/09 with a result of 72.0 mg/L. Because the dried residue weight was inconsistent with the sample aliquot filtered, TDS was reanalyzed on 1/22/09. The reanalysis yielded a result consistent with both the pre-screen aliquot assessment and the surrounding QC recovery data. |                               |            |             |  |                              |        |                    |

| TDS was initially performed on 1/20/09 with a result of 98.0 mg/L and matrix spike recovery of 7%. Because the dried residue weight was inconsistent with the sample aliquot filtered, TDS was reanalyzed on 1/22/09. The reanalysis yielded a result consistent with both the pre-screen aliquot assessment and the surrounding QC recovery data. |                               |            |             |  |                              |       |                    |

| TDS was initially performed on 1/20/09 with a result of 82.0 mg/L and matrix spike recovery of 3%. Because the dried residue weight was inconsistent with the sample aliquot filtered, TDS was reanalyzed on 1/22/09. The reanalysis yielded a result consistent with both the pre-screen aliquot assessment and the surrounding QC recovery data. |                             |            |             |  |                              |       |                    |

| TDS was initially performed on 1/20/09 with a result of 111 mg/L. Because the dried residue weight was inconsistent with the sample aliquot filtered, TDS was reanalyzed on 1/22/09. The reanalysis yielded a result consistent with both the pre-screen aliquot assessment and the surrounding QC recovery data. |                               |            |             |       |                              |        |                    |

## Quality Control Summary

Client Name: RMT, Inc.  
 Reported: 01/27/09 at 06:43 PM

Group Number: 1128134

Matrix QC may not be reported if site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD was performed, unless otherwise specified in the method.

| <b>ppm</b>              | parts per million – One ppm is equivalent to one milligram per kilogram (mg/kg), or one gram per million grams. For aqueous liquids, ppm is usually taken to be equivalent to milligrams per liter (mg/l), because one liter of water has a weight very close to a kilogram. For gases or vapors, one ppm is equivalent to one microliter of gas per liter of gas. |                        |                                                |

Analytical test results for methods listed on the laboratories' accreditation scope meet all requirements of NELAC unless otherwise noted under the individual analysis.

Tests results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff. This report shall not be reproduced except in full, without the written approval of the laboratory.

## **Quality Control Summary**

Client Name: RMT, Inc.  
 Reported: 01/27/09 at 07:17 PM

Group Number: 1128179

Matrix QC may not be reported if site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD was performed, unless otherwise specified in the method.

| <b>ppm</b>              | parts per million – One ppm is equivalent to one milligram per kilogram (mg/kg), or one gram per million grams. For aqueous liquids, ppm is usually taken to be equivalent to milligrams per liter (mg/l), because one liter of water has a weight very close to a kilogram. For gases or vapors, one ppm is equivalent to one microliter of gas per liter of gas. |                        |                                                |

Analytical test results for methods listed on the laboratories' accreditation scope meet all requirements of NELAC unless otherwise noted under the individual analysis.

Tests results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff. This report shall not be reproduced except in full, without the written approval of the laboratory.

Matrix QC may not be reported if site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD was performed, unless otherwise specified in the method.

### **Sample Matrix Quality Control**

\*- Outside of specification

- (1) The result for one or both determinations was less than five times the LOQ.
- (2) The unspiked result was more than four times the spike added.

Analytical test results for methods listed on the laboratories' accreditation scope meet all requirements of NELAC unless otherwise noted under the individual analysis.

Tests results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff. This report shall not be reproduced except in full, without the written approval of the laboratory.

| The recovery of bis(2-ethylhexyl)phthalate was outside of QC limits in the LCSD. This sample was re-extracted outside of the method required holding time, and acceptable QC and comparable data were observed. The data reported here is from the initial extraction of the sample. |                               |            |             |                              |                    |

|            |                                |            | The recovery of bis(2-ethylhexyl)phthalate was outside of QC limits in the LCSD. This sample was re-extracted outside of the method required holding time, and acceptable QC and comparable data were observed. The data reported here is from the initial extraction of the sample. |                              | 200                |

|            | The recovery of bis(2-ethylhexyl)phthalate was outside of QC limits in the LCSD. This sample was re-extracted outside of the method required holding time, and acceptable QC and comparable data were observed. The data reported here is from the initial extraction of the sample. |            |             |  |                              |        |                    |

|            | The recovery of bis(2-ethylhexyl)phthalate was outside of QC limits in the LCSD. This sample was re-extracted outside of the method required holding time, and acceptable QC and comparable data were observed. The data reported here is from the initial extraction of the sample. |            |             |   |                              |       |                    |

|            | The recovery of bis(2-ethylhexyl)phthalate was outside of QC limits in the LCSD. This sample was re-extracted outside of the method required holding time, and acceptable QC and comparable data were observed. The data reported here is from the initial extraction of the sample. |            |             |                              | 1                  |

| The recovery of bis(2-ethylhexyl)phthalate was outside of QC limits in the LCSD. This sample was re-extracted outside of the method required holding time, and acceptable QC and comparable data were observed. The data reported here is from the initial extraction of the sample. |                                |            |             |                              |                    |

## Quality Control Summary

Client Name: RMT, Inc.  
 Reported: 02/03/09 at 07:03 PM

Group Number: 1128376

Matrix QC may not be reported if site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD was performed, unless otherwise specified in the method.

Analytical test results for methods listed on the laboratories' accreditation scope meet all requirements of NELAC unless otherwise noted under the individual analysis.

Tests results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff. This report shall not be reproduced except in full, without the written approval of the laboratory.

## Quality Control Summary

Client Name: RMT, Inc.  
 Reported: 01/28/09 at 03:01 PM

Group Number: 1128377

Matrix QC may not be reported if site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD was performed, unless otherwise specified in the method.

Analytical test results for methods listed on the laboratories' accreditation scope meet all requirements of NELAC unless otherwise noted under the individual analysis.

Tests results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff. This report shall not be reproduced except in full, without the written approval of the laboratory.
